

# Virtual Sensory Excursion

Find the right Sensory Tools for your child or client.

Sensory tools can help with: regulation, processing information, alertness, learning and engagement.

Sensory tools can benefit many children and clients including (but not limited to) those with ASD. However finding the right match can be challenging.

Advisory and Advisory & Support Service (AASS) are offering a **free** workshop for help to select the right sensory resources for your client and/or child.

---

## Virtual Sensory Excursion with:

Kate Piromalli  
Clinical OT Advisor

Merissa Sadler  
Resource Store Coordinator

Tuesday 21st  
September  
12.00pm – 1.30pm

[Book here](#)
