MANLY VALE NSW 2093

Our Ref: TrP2020/ 01042

Dear Resident or Business Owner

### **Traffic Calming Device – Manly Vale Public School – King Street, Manly Vale**

Council conducted a Road Safety Review around Manly Vale Public School and has subsequently been investigating changes aimed to improve school safety in the area.

One of the concerns around the area is in regard to the volume and speed of traffic using King Street, Manly Vale, especially in school peak periods, as well as safety issues for pedestrians crossing this street to access the school.

Council has undertaken a review of the above location and proposes to introduce two raised speed cushions on King Street at approximately 150m intervals. These speed cushions will discourage vehicles from speeding and inappropriate driving behaviour. This in turn, will enhance safety for vehicles entering and exiting their driveways and for pedestrians crossing the road.

A concept plan is enclosed with this letter for your information.

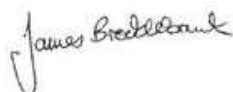

Council invites you to submit your comments on this proposal. Please respond with Support or Non-Support followed by any additional comments **by 22 November 2022**. Your comments will only be considered if they include your name and address. Please note that individual responses will not be provided.

Written submissions can be posted to PO Box 82, Manly NSW 1655, or alternatively, you may email your comments to [Council@northernbeaches.nsw.gov.au](mailto:Council@northernbeaches.nsw.gov.au).

Once feedback has been reviewed, the matter may then be raised for consideration at the Northern Beaches Council Local Traffic Committee. The Traffic Committee's decision will be available on Council's website one week after the meeting.

Should you require further information regarding this proposal, please phone Leila Kazemnezhad, Traffic Engineer, on 8495 7173.

Yours faithfully

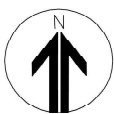

James Brocklebank  
Traffic Engineering Coordinator
